

# LifeSpecific Mini Screens

We understand that sometimes you don't want a full health screen, but you may have a specific health concern that you want investigating in further detail. It might be because of your family's medical history, or because you just want peace of mind.

We have created a range of LifeSpecific Mini Screens that address your immediate health concerns through thorough examinations and rapid testing, all at a time and place that suits you.

**It's time to put your health first.**
